afternoon papers. As I scanned the col- advanced to account for such manifes

The tragic death last evening of Miss Estelle Blaicewood at the home of her parents, 247 Clyde street, comes as a distinct shock to the community. Miss Blakewood had been an invalid for years, having suffered a severe injury in an dle accident in the 1918. Last evening about 10:30, Mrs. Blakewood as is her custom, prepared her daughter's bath and sat reading in an adjoining room preparatory to assist-ing Miss Estelle to bed. After waiting nearly twenty minutes for her daughter to finish her abiutions Mrs. Biakewood went to the bathroom and, opening the door, was horrified to see her daughter huddled down in the bathtub, her head

wholly submerged in the water.

"Dr. Conklin, who arrived within ten minutes after Mrs. Blackwood's cries aroused her limband, who had retired, immediately removed the body to the open back porch and used the most berole means to induce resuscitation. For nearly two hours he labored unceasingly employing every approved form of art ficial respiration. It seemed at one time that the dector's efforts would be re-warded with success, for about 1 o'clock there was a perceptible fluttering of the cyclids and a distinct inhalation, but these evidences of returning life endured but for an instant and shortly afterward the doctor pronounced the patient dead "Dr. Conklin characterizes the case a most extraordinary one, as in all his previous experience he has not known a drowned person to exhibit such sympt

trying to mend and correct such evils that mosquitoes existed. trying to mend and correct such evise as poor ventillation, flareback flues, defective drains, leaking ice boxes, danger-ous exploding gas ranges, without much success. It is only too true that a job ill starred and badly started is very to only \$6 in 1921, notwithstanding our contraction increased 386,000, and in-

most, namely, natural light, plenty of space, high ceilings to render the heat

Certainly not the chef. Although at that time the chef had been more than twelve years with the club, yet, incred-

ible as it seems, he never was directly consulted about the plans of the kitchen where he was going to work. In fact he saw the kitchen for the first time two short weeks before moving in. The cases in New Jersey in 1921. These cases in New Jersey in 1921. These cases were caused by infection by the harm had already been done, of course.

If carte blanche had been given the chef Infortunate Result of a Failure to Consult an Accomplished Chef.

To The New York Herald: One The coming reorganization of the research of the coming reorganization of the research of the coming reorganization of the research of the resea Unfortunate Result of a Failure to on the coming reorganization of the resmonth had elapsed since a well known club had moved to its new quarters on has been tried in New York. I have a New York's most fashionable avenue. On that particular day of May all was

But what is the use of talking? Some county, but it avails little when Suffoll county breeds mosquitoes in myriads, excitement inside the palatial establish-ment, and no wonder. Just think of it: persons will commit the same blunders persons will commit the same but into other counties at this end, and time and time again. Misplaced pride but into other counties at this end, and forbids them to do otherwise. Anybody, a strong cast wind blows them into smart or foolish, rich or poor, can make Staten Island, and from there we get to enable him to right an injustice tee composed both of New Jersey and

Chef Alphonse Plumeratte. New York officials. NEW YORK, April 1.

## April Promise.

April, you've a comely name. What may be its root? Latin smooth as cherry bark Must have borne such fruit.

Who'd have thought "aperio" Gave the sweet degree? Open windows, open brooks, Are its prophecy.

Open eyes to loveliness Of the bridal spring. In a midst of emerald Shyly burgeoning.

Open souls to greet the gifts Of a heavenly hand, Pouring glories without stint

Open bird throats, rending buds, Add their jocund share; With such lures the open sloughs We can surely dare

Unafraid of sucking bogs In the woodland lanes.

Tramp we home with mired feet, Proud of our campaigns. "April. April." how it litts

'April, April," thrushes call Through the shower and gleam. Winter, then, our open hearts

Shall no more annoy; They shall greet the April dawn With an answering Joy.

# Showers of Stones.

Said to Occur Indoors as Well as

Outdoors in the West Indies. To THE NEW YORK HERALD: Refer ences have appeared in the newspapers recently to a mysterious shower of stones at Chico. Col. It may be of interest to note that this remarkable and lerson muttered "Something is trying seemingly impossible phenomenon not without precedent

In the West Indles somewhat similar showers of stones have been reported from many of the islands, not once but "Perhaps it's a cat," I suggested hundreds of times. During a long residence in the West Indies I have heard replied Henderson in a half whisper.

Scarcely were the words out of his mouth when I felt or heard—I don't know which—the rustling sound ascend of these occurrences from both the natives and most trustworthy and intelligent and educated Englishmen, as well as from the officials and police.

trom out their beds in glowing the credulous denizens of these States suns, the daffodlis shall tell suns, the daffodlis shall tell suns, the daffodlis shall tell suns the daffodlis shall tell suns the daffodlis shall tell suns to a pleiosaurus in the Mississippi River windows rattled violently, rattled as if the stories to the negroes' imagination and belief in Obeah, but upon thorough though there was not so much as a pleiosaurus in an inland Patagonian beat of a restricting in the treatons. breath of air stirring in the treetops.

A peculiar feeling, half wonder, half did occur in various islands. Indeed. showed me. These were perfect quartz

But what could that thing have been that was invisible in a moonlight althat was invisible in a moonlight althaut was invisible and a moonlight althaut was invitable and a moonlight al

the house or building itself.

No plausible theory has ever been else, which would preclude the possibility of their being of meteoric origin. But even if we should accept some

when they occur out of doors, how can we account for their falling for the fact that they only fall on certain houses and very often on the same house repeatedly at long intervals?

The natives with their usual superstition look upon them as supernatural. claiming they are the work of Obeal men, but unlike most Obeah doings they do not greatly fear them. I am afraid will be a long time before anybody earns the reward offered for a solution of the Chico shower, and I imagine that for the present at least we might just as well accept the West Indians' expla-NEW YORK, April 1.

### A Mosquitoless New Jersey. Systematic Work Reported to Be Exterminating the Pests.

To THE NEW YORK HERALD: For a number of years the matter of publicity and public cooperation has been before the executive committee of the New Jersey Mosquito Extermination Association. We found that it would be imto ask for publicity without greatly injuring the real estate interests tion without also publishing the fact

It was really a pity, when everything the about the club was all right, that he kitchen should be lacking what the the kitchen should be lacking what the cooks who have to work in it need that the Newark meadows assessment that the Newark meadows are the Newark meadows as the increased 3.117 per cent. New Jersey

is rapidly being made mosquitoless. bearable and good ventilation. Who was responsible for this wretched state of affairs?

New York city is in the care of Eugene Winship and a very practical and effective force. They are working hard, but they have an immense territory to cover. Mr. Winship's work is remarkable and effective, as the New York Bureau of Vital Statistics shows

There is need of work in Suffolk taurant, much money would have been county. There is splendid and effective saved and a different story would now mosquito work being done in Nassau

Dr. Alvah H. Doty says: "All the parks should be charted and divided into sections, and each of these sections carefully examined for mosquito breeding places." This is a good plan, but who places." This is a good plan, but who will do the work? Let me suggest that this be carried out by the Park Com-missioners through the Boy Scouts. Give a small section to each boy. After exboy have a card ruled off into sections and let him mark on that card the depressions or hollows in the ground which the rain fills. After this is done and the cards collected the workmen can around and fill up the depressions or make drainage channels. When this is done there will be no mosquitoes there. The lakes in Central Park, and espe cially the edges of the lakes, can be taken care of by oiling.

CHARLES LEE MEYERS. NEW YORK, April 1. Shifting the Responsibility.

# From the Galveston News.

Another sign that the modern men are improving is that some now blame the Fed-eral Reserve banks instead of their wives.
